

**2005-2008 Ford Mustang Adjustable Strut Tower Brace**  
Item # 1005

**Note:** May not fit V6 models and models with factory engine cover. WILL NOT FIT GT 500 CARS

**Includes:**

- (1) Strut tower brace assembled with adjustable rod eyes
- (2) Mounting brackets
- (2) 5/8" x 2-1/2" Bolts
- (2) 5/8" Lock nuts

- 1.** Using a 13mm wrench remove the (2) inner strut nuts on both the passenger side and driver side, the nuts closest to the engine. Save nuts
- 2.** Locate (2) mounting brackets supplied and install one on each side using the nuts removed in step # 1. Tighten strut bolts to 32 ft. lbs.
- 3.** Locate the strut tower brace and install per image below. You may lengthen or shorten the brace by turning the rod eyes in or out if needed. Install both the supplied 5/8" bolts and lock nuts and tighten. Installation is complete.

**Item # 1005**
